## QE II Library - Wireless Printing Service – Windows Vista

<http://www.library.mun.ca/guides/howto/WirelessWindowsVista.pdf>

### Who can use it?

Anyone who is logged into the MUN wireless network and using Windows Vista.

### Where can I use it?

Anywhere that you can make a connection to the MUN wireless network.

### Will my job print immediately?

No. Your job will be queued on the print release station until you are ready to print it out. You have up to 24 hours to come to the library and print out your job before it is deleted from the print queue.

### Where is the printer?

In the lobby of the QEII library.

### How much does it cost?

The cost is 5¢ per page. You will need your student card in order to pay for your print job.

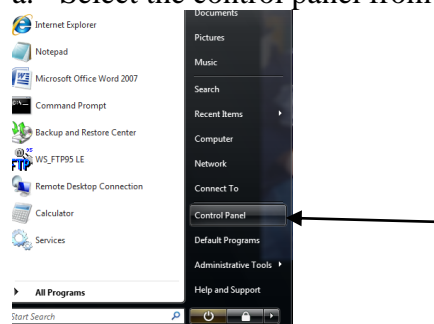

### How do I install the service?

You will only need to install the print software once. After this you can send a job to the library printer whenever you wish.

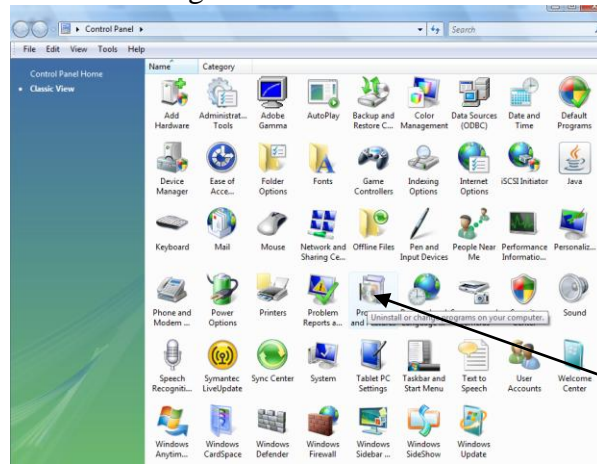

### Instructions for installing wireless printing for Windows Vista (QEII Library):

**Steps 1-2 are for removing old versions of the Pharos software which may have been installed prior to December 6, 2007. If you have not installed wireless printing on your laptop prior to December 6, 2007 start at step 3.**

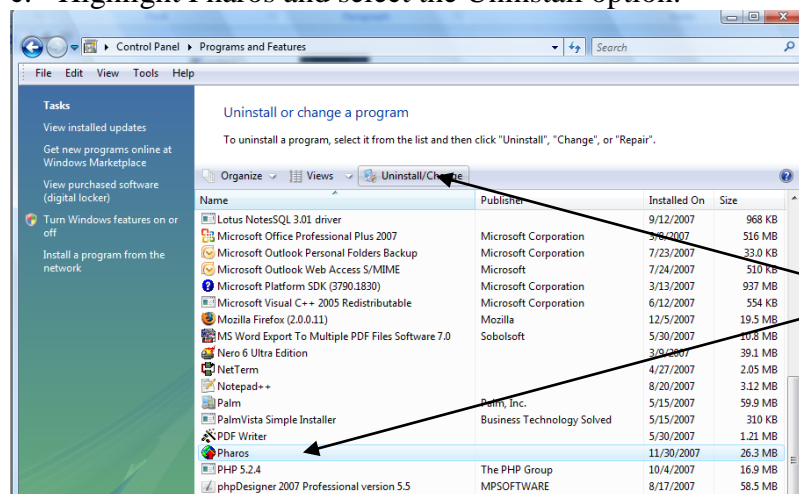

1. Remove all existing Pharos software (If previously installed)
  - a. Select the control panel from your start button

b. Select Programs and features

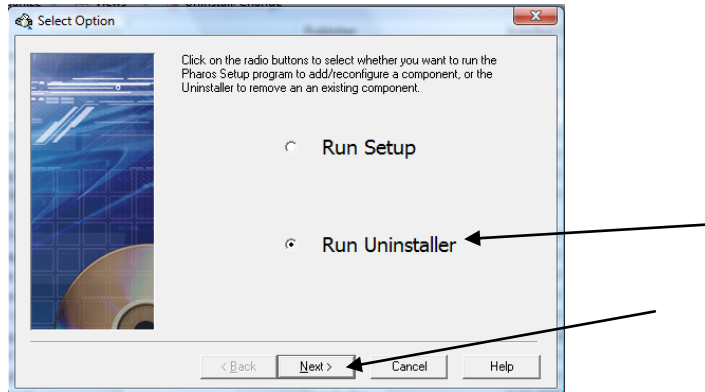

c. Highlight Pharos and select the Uninstall option.

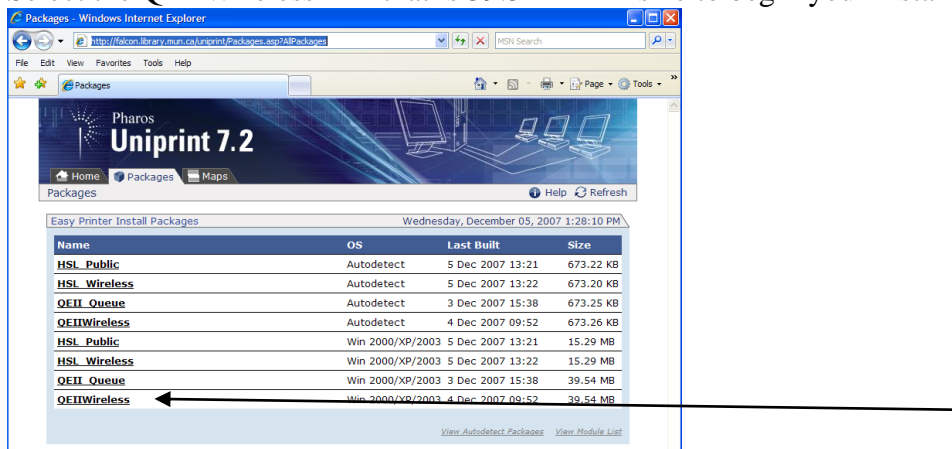

d. There will be a Permission window that will open stating “Windows needs your permission to continue”. Please select the continue button.

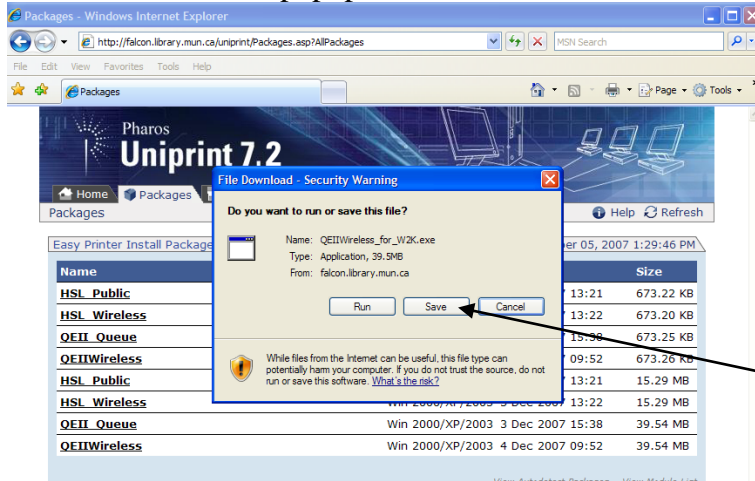

e. You must select the Uninstaller option and select the Next button

- f. Follow the on screen direction for the next series of popup windows to complete the un-install. Reboot if prompted to do so.
2. Delete the Pharos Printer “QEII\_Wireless” if it exist.
3. Open your Internet Explorer and type in the following URL – <http://falcon.library.mun.ca/uniprint/Packages.asp?AllPackages>
4. Select the QEIIWireless link that is 39.54 MB in size to begin your install

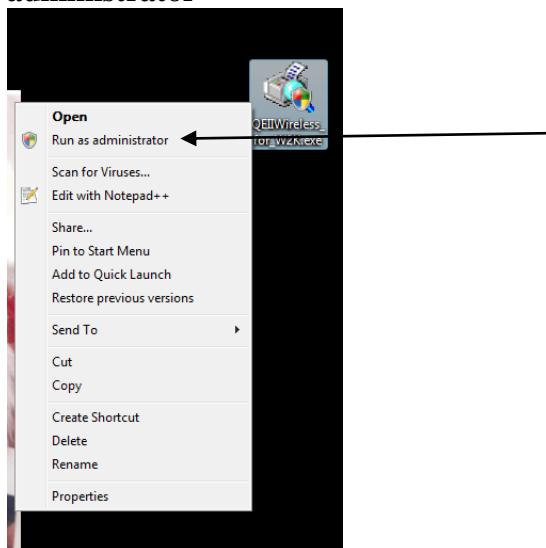

5. Select Save from the popup

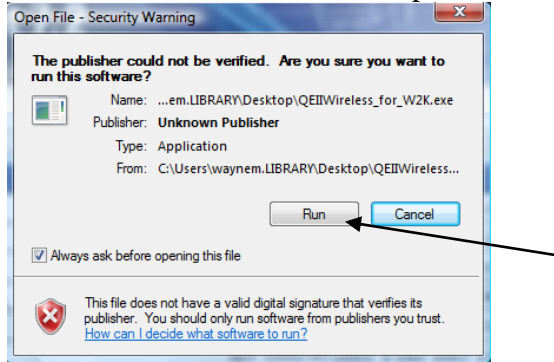

6. You will be prompted to specify a location on where to save the file you are about to download. It does not matter; but just remember where you are saving it to

7. Once the file is downloaded (QEIIWireless\_for\_W2K.exe); you must run it as the administrator for your computer. Just Right Click on the icon and select “**Run as administrator**”

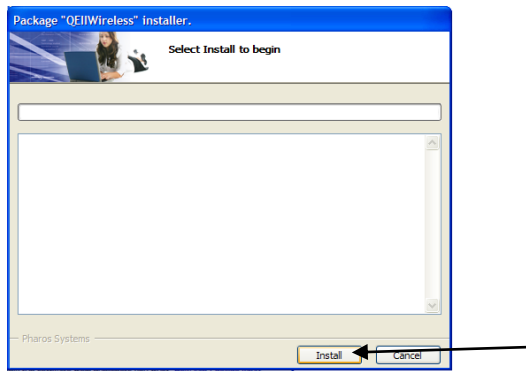

8. Select the Run Button for the Open File – Security Warning

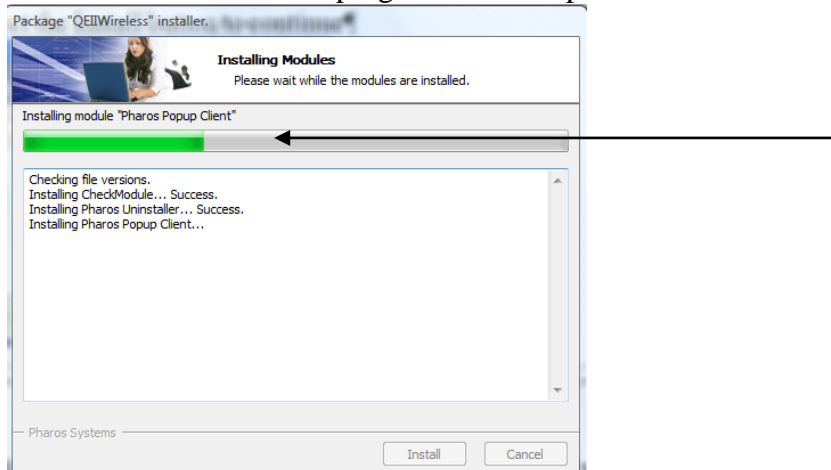

9. Select Allow when you receive a security warning

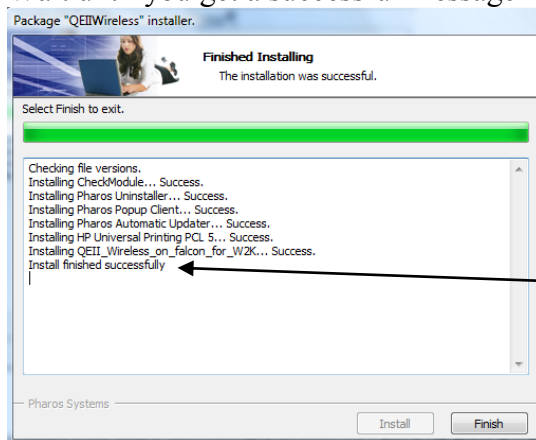

10. Select the Install button to continue

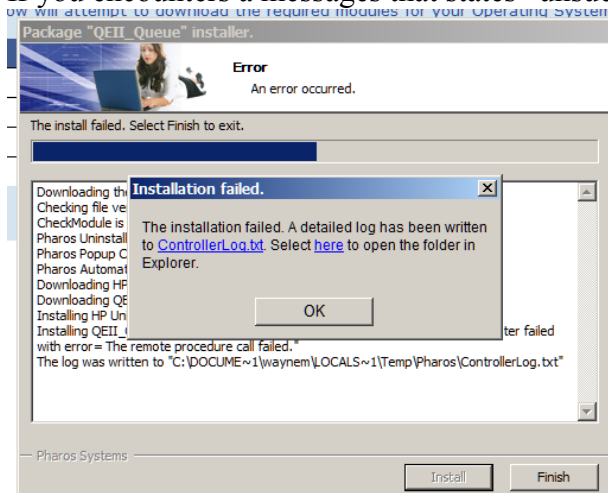

11. You will see the installer window go through a series of installs of the different modules. Just follow the progress bar on top.

12. Wait until you get a successful message “**Install finished successfully**”

13. If you encounter a message that states “unsuccessful Install”

14. Just select the “OK” button; then the “Finish” Button. Delete you newly created printer and then re-run the setup again; right from the QEII\_Wireless link. (You may have to refresh your printer window in order to see the newly created printer) The setup this time will only install the last module that failed; therefore in will be faster.
