Health Sciences Library Wireless Printing Service FAQ

Who can use it?

Anyone who is logged into the MUN wireless network.

Where can I use it?

Anywhere that you can make a connection to the MUN wireless network.

Will my job print immediately?

No. Your job will be queued on the print release station until you are ready to print it out. You have up to 24 hours to come to the Health Sciences Library and print out your job before it is deleted from the print queue.

Where is the printer?

In the photocopy room.

How much does it cost?

The cost is 5¢ per page. You will need your student card to pay for your print job.

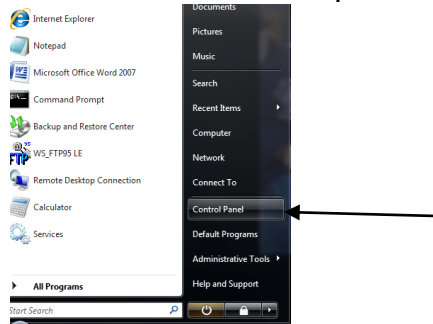

How do I install the service?

You need to follow this guide step-by-step to:

Steps 1-2 are for removing old versions of the Pharos software which may have been installed prior to January 1, 2011. If you have not installed wireless printing on your laptop prior to January 1, 2011 start at step 3.

1. Remove all existing Pharos software (If previously installed)

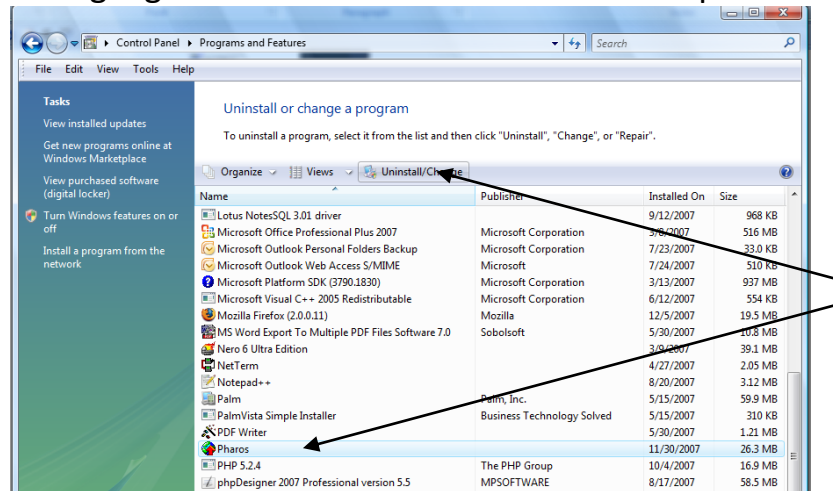

a. Select the control panel from your start button

b. Select Programs and features

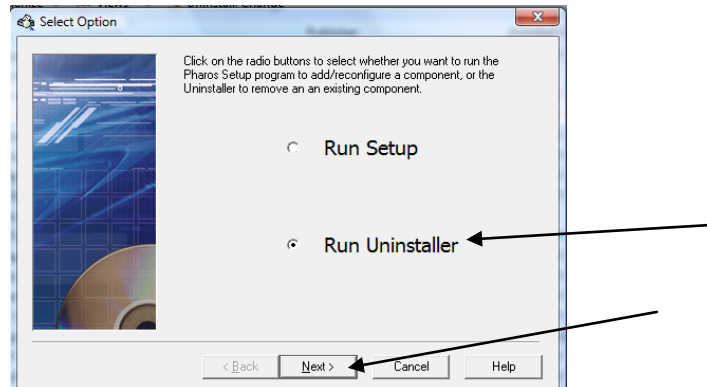

c. Highlight Pharos and select the Uninstall option.

d. There will be a Permission window that will open stating “Windows needs your permission to continue”. Please select the continue button.

e. You must select the Uninstaller option and select the Next button

f. Follow the on screen direction for the next series of popup windows to complete the un-install. Reboot if prompted to do so.

2. Delete the Pharos Printer “HSL_Wireless” if it exists.

Old versions of Pharos should now be uninstalled.

3. Now you need to download and install the newest version of Pharos, our wireless printing software.

Open Internet Explorer and type in the following URL:

http://www.library.mun.ca/HSL/wirelessprinting/HSLABSRV_HSLCommonSpoolQueue_for_Lte.exe

4. Select Save

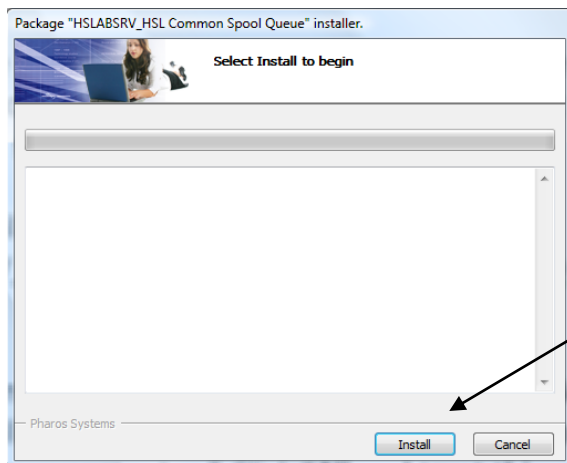

5. You will be prompted to specify a location where you want to save the file you are about to download. It does not matter; but just remember where you save it.
6. Once the file is downloaded (HSLABSRV_HSLCommonSpoolQueue_for_Lte.exe); Click the file icon

You will be receive the message:

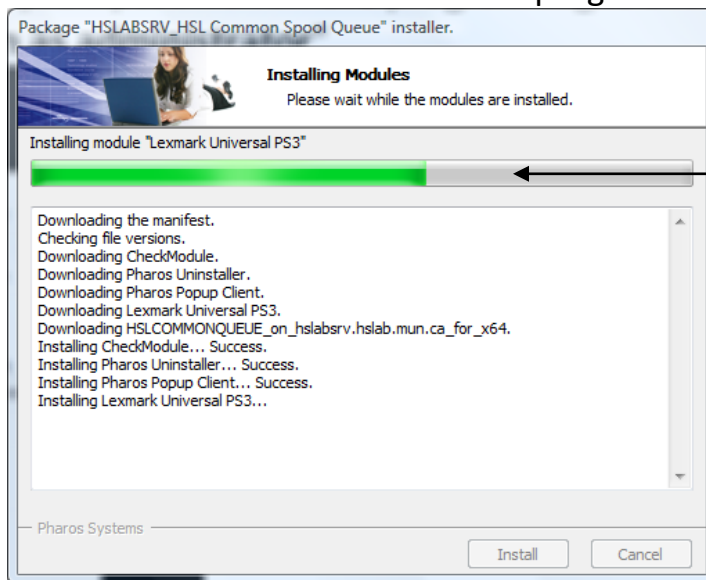

An unidentified program wants access to your computer.

Click **Allow (I trust this program. I know where it's from or I've used it before)** to start installing the program.

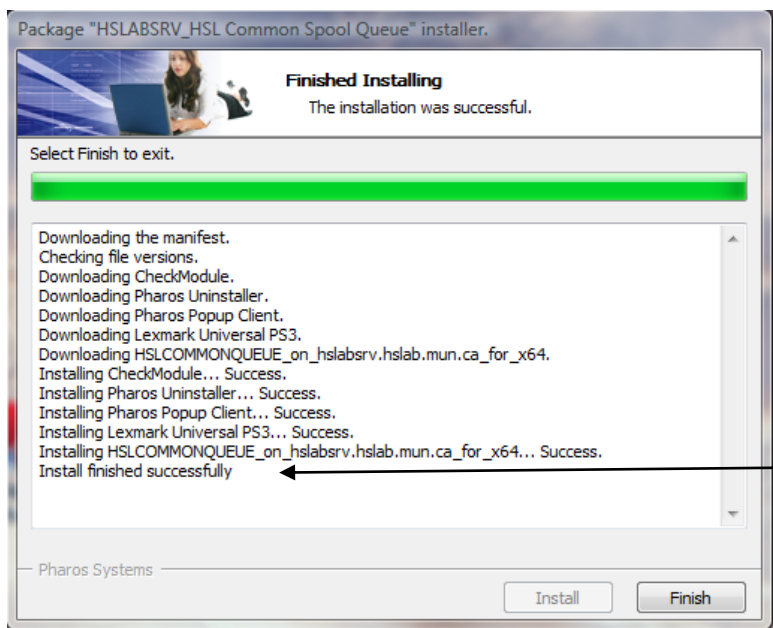

7. Click Install

8. You will see the installer window go through a series of installs of the different modules. Just follow the progress bar on top.

9. Wait until you get a successful message "Install finished successfully" then click **Finish**

You can now print to the HSL printer. Click here for print instructions
